How You & Our Town Benefit From Your Involvement:

- Besides building relationships, career mentors can provide industry insight for these students & guide them so they can reach their full potential in a career they can be passionate about & know how to get there.
- By pairing students with community members, students will know a person they could potentially work for, intern or apprentice with in the future.
- Career mentoring allows mentors to give back to the community where it is needed the most because we want our talent to stay here or come back home.
- We want our students to know the many faces that make our community such a great place to live, work & raise a family. With the hopes that they grow up to be good employees & business owners, to build roots & to keep growing our town for the better.
- This is a great way to spread the news to our youth that we are proud to live in beautiful Park Rapids, Minnesota & so should they!
